Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Applicants have claimed a detergent composition comprising:
 - (a) an anionic surfactant,
 - (b) a water soluble cationized polymer having a weight average molecular weight of from 100,000 to 2,000,000 and a charge density of from 0.6 to 4 meq/g, and
 - (c) a silicone derivative having a group containing both a hydroxy group and a nitrogen atom as a side chain thereof bonded to a silicon atom.

Applicants' arguments with respect to the references applied against the present claims are found to be persuasive and so these references are withdrawn. The silicone derivative presently claimed is known in the art as an amidomethicone copolyol, for example. At the time the present invention was made, however, the prior art did not teach this specific silicone in combination with the cationic polymer and anionic surfactant claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles I. Boyer whose telephone number is 571 272 1311. The examiner can normally be reached on M-Th 9:30 to 6:00.
